

Innovative Technology for Facilities Teams

Fast

Imagine a HVAC technician reparing an AC unit on the roof of the hospital. The last thing he or she needs is a trip to the planroom to find missing information. ARC Facilities provides instant access to equipment details, O&Ms, shutoffs and As-Builts right on the technician's phone.

Simple

Healthcare facilities are complex environments. With ARC, we've simplified access to critical facility information so teams can respond safely and quickly to any situation. Now finding a piece of equipment or a shutoff is as simple as looking at a map and tapping the screen on a phone or tablet.

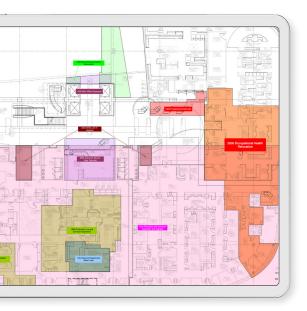

Smart

Our artificial intelligence (AI)-powered technology is genuinely smart. Running in the cloud, it knows how to extract intelligence from your legacy documents and building drawings. It then organizes your information so anyone can quickly and easily find exactly what they need.

One Platform, Four Modules

ARC Facilities is a gamechanger for facilities professionals. Unlike legacy systems, our solution is optimized for mobility, speed and simplicity. We use Al and machine learning to extract intelligence from building, equipment, emergency and compliance documents so anyone can find what they need. It's lightning-fast and as easy-to-use as any of your favorite apps.

Interactive As-Built maps display the historical record of renovations over time. Tapping a colored shape instantly loads the entire plan set.

ARC Buildings

Instantly access building information including plans, As-Builts and shutoff locations. Eliminate wasted time searching planrooms, computers and network drives.

ARC Equipment

Use interactive maps to instantly locate equipment in a building or on a campus. Technicians access O&Ms, photos, service logs, and more to quickly complete maintenance and repairs.

ARC Emergency

Emergency situations develop suddenly and escalate quickly. Instantly access critical building, life safety, and equipment information to minimize damage and protect lives.

ARC Compliance

Intelligently manage and prepare for your next compliance survey with instant access to your Environment of Care, Life Safety and Emergency Management documentation.
